NoteFest for School Orchestra

The teaching platform for school orchestra. Google Classroom rosters, one-click assign, progress in one place.

Built in the orchestra classroom, not a software boardroom.

Sergei Panov teaches public-school orchestra. NoteFest is built around problems from that room: rostering, assigning work, seeing who understands it, and getting rehearsal back to playing.

Why teachers use it

Spend rehearsal teaching music, not entering grades and managing accounts.

- Import a Google Classroom roster. No typing hundreds of student accounts.
- Assign a lesson, skill, or Year 1 to the class from one place.
- See who finished, who is missing, and scores in NoteFest Grades. You still review.
- When the class is linked, the assignment can also post to Google Classroom. Scores stay in NoteFest for now.
- English and Spanish, including spoken audio, so listening counts.

What students and admins get

NoteFest is built around orchestra, not a generic LMS.

- Violin, viola, cello, and bass in one class. Each student gets their own book.
- A beginner and an advanced player can work at different levels in the same orchestra.
- Short lessons for note reading, rhythm, and skills students actually finish.
- Admins see seats, instrumentation, and class progress without chasing spreadsheets.
- School accounts skip the consumer newsletter. We do not harvest Workspace emails for marketing.

School pricing

Annual school license. Invoice or purchase order. Not a family credit card.

$299 up to 40 students
$499 up to 75 students
$749 up to 125 students
$999 up to 200 students

More than 200 students? Ask about volume pricing. Play is free to try. Families who want saved progress outside school can Go Pro. School seats are a separate product.

Privacy before any paid school

We complete FERPA and COPPA paperwork with you before we invoice or turn on student accounts. Not a certification badge. A signed school packet.

- FERPA school-official student-data agreement.
- COPPA terms for students under 13.
- No advertising. We do not sell student data.
- Teacher-controlled classes. School accounts skip the consumer newsletter.
- Deletion and export on request. School privacy policy before setup.

Google Workspace

Staff and students sign in with school Google accounts. Teachers connect Classroom and import their own rosters. We do not need student passwords.

- Your Google Workspace domain (and a student domain if it is different).
- Allow NoteFest as a third-party app in Google Admin so staff and students can sign in.
- If Google asks to verify the app, allow it for your domain.
- Teachers already using Google Classroom for their sections.
- One tech or admin contact. Teachers pick which classes to import.

Try it

Request a teacher or admin demo: hello@notefest.com or notefest.com/contact. Forward this page to a supervisor. If it helps, ask for a one-page quote your business office can PO.

NoteFest 2026. Beginning orchestra. Violin, viola, cello, and bass.
